Dearest Friend,

If you are passionate about helping millennials navigate the overwhelming but exciting transition from school to career, this is the perfect opportunity for you! As we work together from the ground up to help them succeed, one of the most effective ways to get involved is to host a private party. You will help us grow their network, learn about their goals and help us meet a collective fundraising goal of $5,000. More importantly, you will expose, educate and energize your family and friends to the millennials who inspire us.

Since our beginning in 2012, we have assisted over 500 millennials with transitioning into the global workforce, adult life and higher education. These young adults have received help with developing professional documents such as resumes and college applications; interview, dining etiquette and networking skills; placement with employers and paid internships; the transition from incarceration to the community; exploring and enrolling in college; and connecting with experienced professionals who help them better understand the conditions, required training and expectations of the careers they are pursuing.

We were reminded about the important work we do by a 2016 study that states over half of recent university graduates consider themselves underemployed. (the source)

At the heart of Mission Accomplished is the belief that everyone should have access to training, coaching, mentoring and support. At Mission Accomplished we coach, develop and inspire millennials to find their purpose, develop their skills and direct their future.

SINCERELY,

THE MISSION ACCOMPLISHED TEAM

I shared my dreams and aspirations with Carmen. She strongly encouraged me and proposed different strategies on how to structure long term and short term goals. My passion for policy and social justice lead Carmen to help me get a paid internship with the Albany County Legislature.”
